

SHRINIWAS SHARMA

Machine Learning Engineer | Data Scientist

Eindhoven, The Netherlands @shriniwas\_sharma@pm.me shriniwas26.github.io shriniwas26 shriniwas26

About Me

I'm a Machine Learning Engineer and Data Scientist with a solid engineering background, focused on deploying machine learning models into production environments. I'm proficient in Python and data science libraries, with experience using Cloud services to build scalable solutions. With a strong foundation in engineering principles, I enjoy data challenges and turning them into practical solutions. I'm adaptable, eager to learn new technologies, and excited about contributing to a forward-thinking organization.

SKILLS

Programming Languages

Python (Proficient) R (Intermediate) JavaScript (Intermediate) C++ (Familiar)

Data Science Libraries

Pandas Scikit-Learn XGBoost PyTorch

Visualization Tools

Plotly/Dash d3.js

Development & Operations Tools

Docker Git GitHub Linux MLflow Azure

PROJECTS

COVID-19 Data Visualization

- Developed an interactive dashboard to analyze and visualize COVID-19 data trends over time.
- Deployed on Netlify and Heroku using GitHub pipelines for CI/CD.
- Map Dashboard on Netlify
- Dashboard on Heroku

Python React d3.js Plotly

LANGUAGES

English

Dutch

Hindi

EDUCATION

M.Sc. (Computer Science) Eindhoven University of Technology

Aug. 2016 - Feb. 2019

B.E. (Manufacturing Engineering)

BITS Pilani, India

August 2010 - June 2014

EXPERIENCE

Senior Software Engineer (Machine Learning Product)

Maaind Ltd.

Nov. 2022 - August 2024 Eindhoven, The Netherlands

- Spearheaded the construction of a CI/CD pipeline, integrating static code analysis and vulnerability scanners to enhance code quality and security.
- Designed and automated data pipelines, enhancing data ingestion, transformation, and visualization processes, speeding them 2x, using a cookie-cutter approach for new data sources and clients.
- Executed exploratory data analysis and developed predictive models on physiological data, deriving insights that improved decision-making.
- Developed and implemented a model observability and monitoring pipeline, using Azure ML Studio, enabling real-time tracking of model performance and data drift.

Python Django Rest Framework (DRF) Azure PyTorch PySpark

Data Scientist

Phenospex B.V.

May 2020 - Feb 2022 Heerlen, The Netherlands

- Developed and implemented (full -stack) machine learning models for predicting plant diseases, which helped clients identify new fungicides 10x faster.
- Presented proof-of-value using hypothesis testing methods (t-tests and ANOVA), and helping convert PoV projects to clients.
- Created interactive dashboards and visual tools for EDA, model performance, enhancing client engagement and understanding for non-technical stakeholders.

Python3 R/Shiny Scikit-Learn JavaScript Plotly/Dash D3.js

Software Developer

Sioux B.V.

Feb. 2019 - April 2020 Eindhoven, The Netherlands

- Contributed to the development and maintenance of Philips Healthcare's digital pathology solutions, ensuring robust performance in clinical settings.
- Collaborated with interdisciplinary teams to implement software updates, reducing downtime by 15%.

C++ Python3 Debian Linux.

Software Developer

Grey Orange Robotics Pvt. Ltd.

May 2014 - July 2016 New Delhi, India

- Engineered fault-tolerant control server solutions for multi-robot coordination, achieving a system uptime of 99.9%.
- Developed critical software subsystems in collaboration with teams across engineering disciplines, leading to a 10% improvement in system efficiency.

Erlang Open-Telecom Platform (OTP) Python3 C++

MISCELLANEOUS

- Dutch Nationality. Sponsorship not required.
- Enjoy playing guitar, cooking, exploring documentaries, and working DIY tech projects in my free time.
